Dated: 14.12.2023

Delhi Technological University (DTU) Delhi has been an institution of repute in the field of technological higher education and has striven to excel in research, engineering and various areas of applied sciences.

I am happy to know that the Department of Physics, DTU is organizing an International Conference on Atomic, Molecular, Material, Nano and Optical Physics with Applications (ICAMNOP 2023), during 20th -22nd December, 2023. The conference will focus on the science supporting areas such as information technology, energy, space technology, and defence. It is indeed praiseworthy that practical application of specialized streams of technology discipline are being discussed, as it is this aspect of science that is critical for socio-economic development.

I am sure that the conference will serve as a common platform for academicians, scientists, researchers, and students to exchange their ideas and expand their research network.

I convey my best wishes to the organizers and extend my warm greetings to the participants.

(Vinai Kumar Saxena)
