MESSAGE

I am happy to know that The Institution of Electronics and Telecommunication Engineers (IETE) is organizing its **56th Mid Term Symposium (MTS) and International Conference** on the theme "**SMART MOBILITY SYSTEMS (ICSMS-2025)**" on 26-27 April, 2025 at Dr. Ambedkar International Centre, New Delhi.

It gives me satisfaction to know that IETE doing well to accomplish its mission of empowering the youth by providing them with the necessary knowledge, skills and confidence to actively participate in society, drive positive change, and reach their full potential.

Improving traffic management by implementing Smart Mobility using environmental friendly solutions like smart parking and non-motorized vehicles (NMVs) is the imperative towards converting Delhi into a Smart City. Traffic Congestion and parking challenges have long plagued the Capital City, causing delays, stress and pollution. To identify innovative solutions to these challenges a platform is initiated by GGSIPU "Smart Delhi Ideathon 2025", in collaboration with AICTE to provide a unique opportunity for students from different Universities, Engineering and Management Institutions to actively contribute to the city's progress by becoming stakeholders in ideating for solutions to problems that Delhi faces.

I convey my wishes for the success of the Conference and believe that the deliberations will highlight numerous initiatives underway across industry, academia and various levels of government and will help seek a roadmap for the coordinated realization of this National Mission.

(Vinai Kumar Saxena)
