MESSAGE

I am happy to know that Indraprastha Vigyan Bharati is publishing a compendium on the theme "Viksit Delhi 2047 through Science and Technology." Aligned with the Hon'ble Prime Minister's vision of an Atmanirbhar and Viksit Bharat by 2047, this initiative highlights how scientific innovation, responsive governance and public participation can shape a sustainable and inclusive National Capital.

Building a future-ready Delhi requires translating research into practical solutions for interconnected urban and environmental challenges. Priority must be given to cleaner air, effective waste management, Yamuna rejuvenation, groundwater recharge and heat-sensitive urban planning. Simultaneously, integrating public transport, expanding safe walking and cycling networks and leveraging geospatial and digital tools will enhance civic services while safeguarding privacy and accessibility.

Science and technology must also bolster public health through affordable diagnostics and preventive care. By connecting Delhi's universities, research institutions, hospitals and start-ups around pressing civic needs, we can accelerate real-world impact. Equally vital is nurturing scientific temper, curiosity and entrepreneurial skills among our youth, bridging India's rich scientific heritage with modern knowledge.

I congratulate all contributors and wish this compendium every success.

Taranjit S. Sandhu
